24 privacy

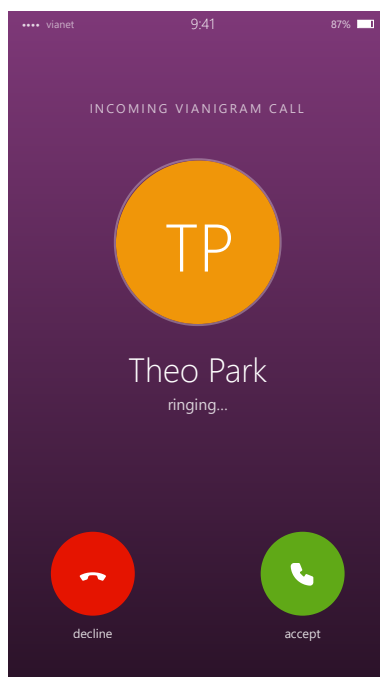

25 active sessions

calls & secret chat

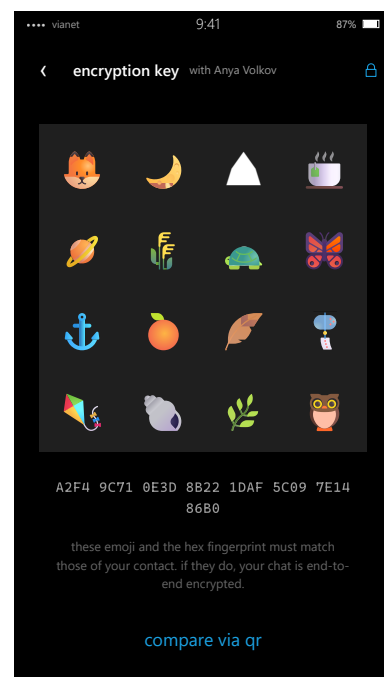

outgoing / incoming call screens with full-bleed accent gradient, secret-chat encryption-key fingerprint.

26 outgoing call

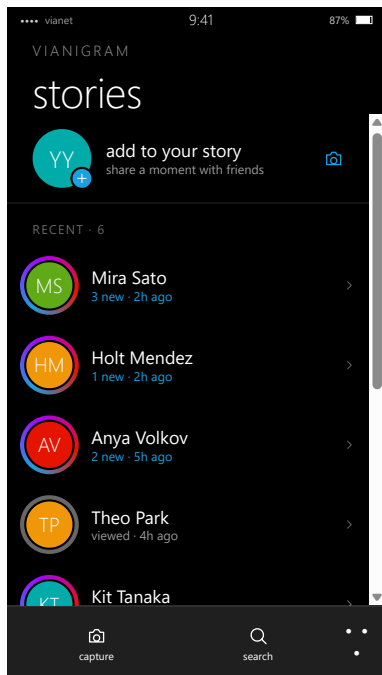

27 incoming call

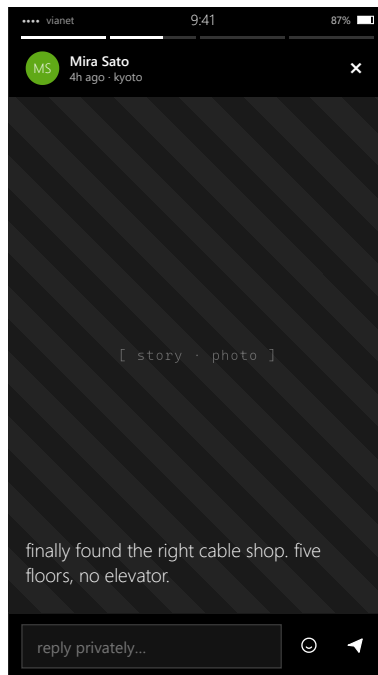

28 encryption key

stories

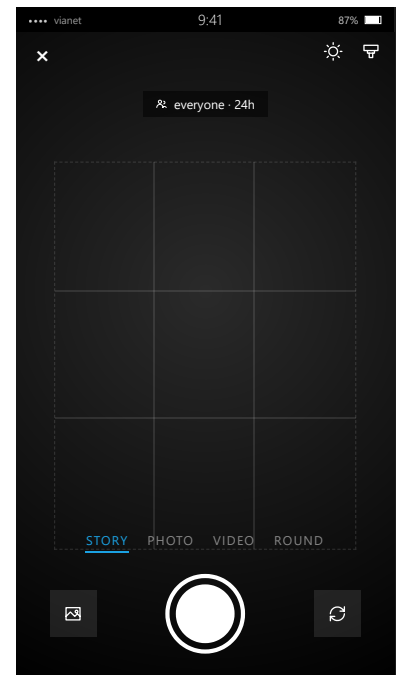

story list with conic ring (unread → cyan→violet→magenta), full-bleed viewer with segment progress, dedicated capture camera.

29 stories list

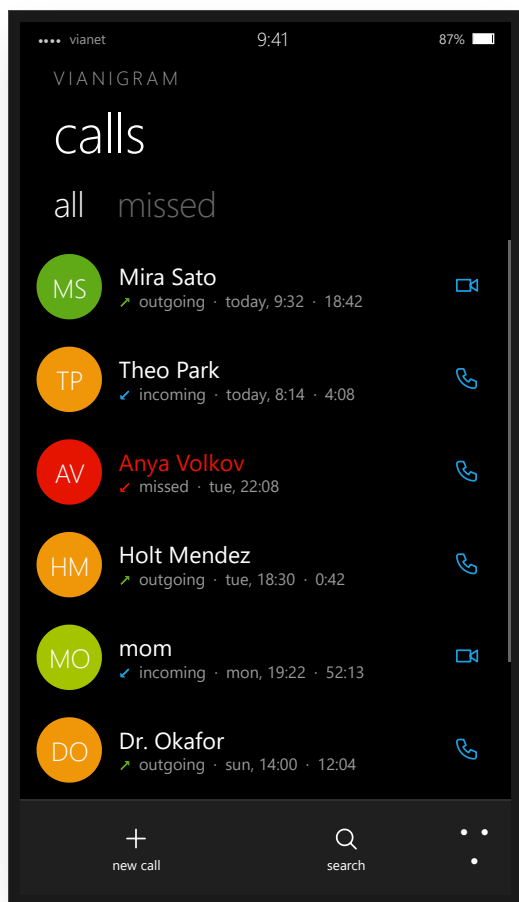

30 story viewer

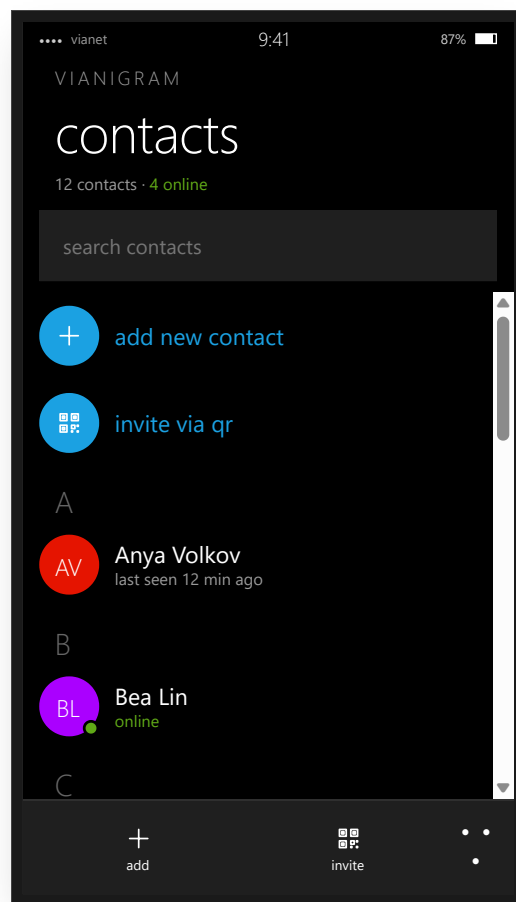

33 story camera

calls list & contacts

full call history with all/missed pivot and direction-coded arrows. a-z grouped contacts with online indicators.

31 calls list

32 contacts

system notes

interaction language, motion, and gesture conventions across the app.

tilt-press

every list row + button uses a perspective transform ($\pm 3^\circ$) toward the press point. on touchend the row springs back over 120ms. signature wp interaction.

swipe gestures

left-swipe a chat row to mute · right-swipe to pin. revealed actions use the row-height accent fill, no rounded corners.

page transitions

forward navigation: turnstile (rotateY around left edge, 380ms). back: slide-from-left (280ms). no bounce, no rubber-band, no material ripple.

pivot swipe

horizontal swipe between sections. headers parallax at $1.5\times$ content speed. adjacent header peeks from the right edge to telegraph swipeability.

app bar overflow

ellipsis (...) on the chat-list app bar reveals: new group · new channel · contacts · saved messages · calls · settings.

progress

indeterminate: 5 accent dots, 2.4s loop, sliding left→right with stagger. determinate: 2px hair-thin accent bar at top of content area.
